

Monitoring Solutions DataViewer

*All your data in
one online tool*

Groundwater | Surface water
Precipitation | Soil moisture
Flow | Evaporation | Waste water

DataViewer

Royal Eijkelkamp's sensors and telemetry solutions enable you to collect reliable soil and water data in a cost-effective way. DataViewer provides insight into these measurements via a user-friendly platform. DataViewer is an online tool that gives you access to data - anytime, anywhere - from all your measurement locations.

All relevant data from a measuring point is clearly displayed at the touch of a button. DataViewer is suitable for access via desktop, tablet and mobile devices (IOS and Android).

Upgrade

In addition to providing data insight, you have additional options such as; setting alarms, downloading data, adding soil profiles and photos or linking data to your own web environment via FTP or API. For more information and possibilities, please contact our monitoring experts at +31 313 880 200 or sales@eijkelkamp.com.

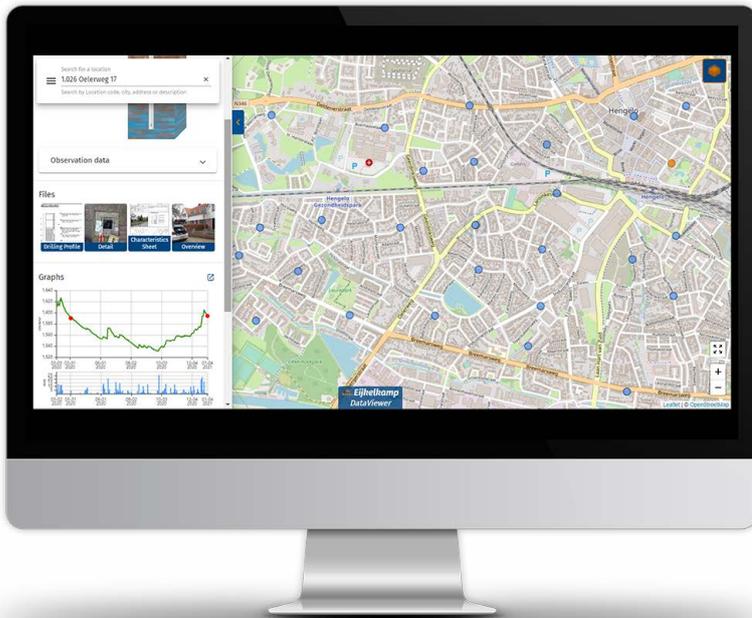

DataViewer is part of Royal Eijkelkamp Monitoring Solutions.
